

Wire Boss Granulator System

The **Wire Boss Granulator System** is built to be a low cost, low maintenance, high efficiency granulator system. The system is modular and expandable, with the ability to grow with your business. Here are the main components of the **Wire Boss Granulator System**:

Granulator — SM-1100+

The Stokkermill SM-1100+ is designed and manufactured for standard insulated wires. The PLC-controlled granulator has an air filtration system, as well as a large table for improved separation.

SM-1100 PLUS	
Power	8.5 KW 14 KW
Production	170/260 lb 220/330 lb
Dimensions	42" x 67" x 79"
Weight	1760 lb

Pre-Shredder — PS-600

Stokkermill Single Shaft Pre-Shredders are designed for reduction of various materials into a more desirable or useful size. The PS-600 communicates with the SM-1100+ Granulator to keep even flow by adjusting the speed of the material, which allows for better processing. The PS-600 also has a reverse feature to clear jams easily, and is easy to maintain with the ability to make quick blade changes.

PS-600	
Power	11-15 KW
N. of blades	24
Size of blades	1.2" x 1.2"
Rotor Dimensions	24" x 12"
Feed Opening	47" x 28"
Dimensions	67" x 47" x 79"
Weight	3,307 lbs

Conveyor — NST-4000

The NST-4000 is purpose-built for wire granulating. This conveyor has a built-in head pulley magnet to remove any ferrous material. It has an aluminum lightweight design and is gear box-driven and with adjustable legs.
